bradleycorp.com/halo

- Enhanced dust cover design** in clear translucent yellow allowing for easy inspection. When the cover is opened, water flow starts automatically – giving the user instant relief.
- Separate supply and waste pipes** to eye/face wash are an industry first and a Bradley exclusive! Meets US and European plumbing requirements.
- The Aquaduct™** design is the only self-draining design for standard eyewash models — another industry first and Bradley exclusive. The self-draining Aquaduct™ helps reduce the risk of bacteria growth when unit is not in use.
Integral strainer inside the Aquaduct™ reduces debris in the water for additional eye protection and also prevents clogging.
- New dust cover caps** on the eyewash are hinged for a more secure hold – keeping dust and debris off the water spouts.

Anti-microbial protection protects the eyewash and eye/facewash heads.
